Highlights

ABOUT US

The Orchid Scholarship Foundation is a non-profit voluntary organization aimed by the vision to promote education and development of Vietnam via supporting and awarding scholarships to poor, talented and passionate high school students.

HISTORY

The foundation was established in 2013 as the successor of Sakura Scholarship originated in 2010 in Japan. In the year 2014, there are 47 students nationwide have obtained the scholarships. In the last four years, we have awarded 124 scholarships to students from Tong hop (Hanoi), Su pham (Hanoi), Hau Loc I (Thanh Hoa) and Quoc hoc (Hue) high schools in Vietnam.

CORE VALUES

Transparency, effectiveness and sustainability are our core values.

HOW TO DONATE

You can donate us by cash, bank transfer or other means. Please see at the end of this document for details. Should you have enquiries please contact us at: orchidscholarship@gmail.com.

Motivations

Vietnam is a poor developing country. We, Vietnamese young professionals and students, used to raise a question: When will Vietnam become a developed country: 10 years, 20 years, or a century? Only young generation can answer this question. Among solutions, education is the most feasible way to help the youths to change their nation.

However, sadly many good seeds in Vietnam are unable to grow up in a suitable environment due to educational stagnation and poor circumstance. Thousands pupils are unable to go to school or delicate to study because of financial difficulties, which limit them not only to explore their actual abilities but also to pursuit their dreams. As a consequence, the nation could waste high-quality work forces including skillful engineers, talented scientists, or brilliant economists; meanwhile, it still have to maintain the unemployed.

This fact triggers our motivation. We, the Vietnamese professionals and students working and studying aboard, realized that we should to take responsibilities for the future of Vietnam. Speeding up educational transformation and encouraging young talents should be a key mission. From such views, we managed to establish a non-profit organization, namely Orchid Scholarship Foundation (in Singapore in 2013) as a successor of Sakura Scholarship Foundation (established in Japan in 2010) to implement our wishes.

We focus on the high school students, who are 15-18 years old. This stage is the crucial transitional period for youths which can change their destiny, by either opening a gate to college or closing their promising future. At present, the high school period is not well supported by both government and private sectors, in contrary to college period when students can receive various kinds of aids.

We aim at poor high school students who are excellent and ambitious. The scholarship is small in amount but is big in terms of spiritual encouragement in order to foster them pursuing their dreams.

Visions and Operations

VISIONS

The Orchid Scholarship Foundation is a non-profit organization founded by Vietnamese professionals and students. We aim to become a professional and financial disclosure non-profit organization. Our vision is towards becoming a solid bridge for Vietnamese worldwide, Singaporean and international friends and organizations to contribute efficiently to the development of education and human resources in Vietnam that benefit bilateral nations.

TIMELINES

The new fundraising campaign starts in January. Fundraising events are held both offline and online during the year. In May, we start to receive applications from partners. The evaluation and selection process is completed in August. In September, award ceremonies are held at respective schools. The annual review is conducted around December to assess our activities during the year.

BOARD OF TRUSTEES

Phan Thien Nhan, *Honorary President*

PhD (Sydney), Fellow of Australia Academy of Science
Professor of National University of Singapore

Giap Van Duong, *Board Chairman*

PhD (Vienna), Director of Giap School

Albert Antoine, *Board Member*

MBA (M.I.T.) Senior Vice-President of Catalyst Maritime Corporation

EXECUTIVE VOLUNTEERS

SINGAPORE

Luu Quang Hung, *Executive Head*

PhD (Kyoto), National University of Singapore

PhD (Kyoto), University of Houston

Partnership and Sponsor

PARTNERS

Tong hop Gifted High school

Location: Hanoi City;

Number of students: 1500;

Representative contact: Dr. Le Cong Loi, Associate Professor, Vice-Principal;

History: The school has richest achievements in Vietnam with 59 medals in the International Mathematical Olympiad, 27 medals in the International Olympiad in Informatics and various international and national prizes in mathematics, informatics, physics, chemistry, and biology. This high school is the only institution in Hanoi permit student nationwide to enter, majority of who are poor but aspirated.

Quoc hoc Gifted High school

Location: Hue City;

Number of students: 1400;

Representative contact: Mr. Nguyen Phuoc Buu Tuan, MSc, the Principal;

History: Founded on 1896, Quoc Hoc is the first and oldest high school in Vietnam. The school has been known as a place that promotes various generations of patriotism, industriousness (including President Ho Chi Minh, General Vo Nguyen Giap, Pham Van Dong, Dang Van Ngu etc.). In the year 2013, the school won 52 national prizes in in all subjects including mathematics, informatics, physics, chemistry, biology, and foreign languages etc.

Hau Loc I High school

Location: Thanh Hoa Province;

Number of students: 1300;

Representative contact: Mr. Ha Khuong Duy, BSc, Secretary of Young Staff Union;

History: Hau Loc is a typical high school in rural areas (where total incomes of a local family are less than 200 SGD monthly). The school has about 1350 students. Our local partner staff is Ms. Bui Thi Thanh, vice-principal.

Su Pham Gifted High school

Location: Hanoi City;

Number of students: 1300;

Representative contact: Nguyen Duc Hoang, PhD, the Principal;

History: Founded on 1966, students from the school won 40 medals in the International Mathematical Olympiad. The school has got various Merit from the state including the First Order of the Labour Medal in 2011.

Selection and Awarding Ceremonies

EGLIBIBLE APPLICANTS

- Nominated students (ages of 15-18 years) from 4 partnered schools OR excellent students from any other high-school nationwide.
- Face difficulties in life but gain a good academic performance

SELECTIONS

About 50 students nationwide in the year 2014 will be selected for scholarships. Forty students will be selected at 4 partnered schools, and another 10 students will be selected from other nationwide high schools. This ratio may vary depending on the quality of applications.

Three major criteria are: (i) difficult circumstances in physical or financial aspects, (ii) good studying outcomes as well as (iii) strong aspiration. Student can be awarded up to three times as long as they can maintain their good academic performance during their high school years. At the initial stage, we focus on students living far from home, mostly students come from countryside to cities to study. In the future, more schools nationwide can be considered.

To be considered, applicant must complete an application form, which include (i) personal academic record and family circumstance, (ii) letter of motivation prepared by applicant him/herself and (iii) letter of recommendation from teacher. The completed application form can submit through local partners (i.e. high schools), or send directly to us via email.

To further assess the applicant, we evaluate the application form as well as conduct an interview (mostly to clarify of the application content). The evaluation is based on a standardized scale (by grading circumstance, academic outcome and aspiration by a ratio of 50:30:20). The interview is held by local partners while necessary and will be reported back to the committee with media tapes and text. The final application evaluation is taken by a committee (whose are executive volunteers and independent reviewers) and finally approved by the Board of Trustees.

SCHOLARSHIP VALUE

Based on the donation amount each year, we will decide the number of awards. About 10 scholarships will be awarded to each high school annually. We attempt to award regularly and to revise the scholarship amount as well as increase the number of awards. Since 2014, each scholarship is accompanied by a certificate and a financial support of 2,000,000 VND (equivalent to 120 SGD). This amount covers all the tuition fees for each awarded student within the year.

The donation from donors is used only for awarding scholarship. 100% fund raised goes directly into student. 100% operational expenses (transportation, meeting, certificate, etc.) are absorbed by executive volunteers. Financial transparency is our highest priority. The contact address of all awardees will be explicitly public. All explicit and anonymous donations are published on our website, as well.

AWARDING CEREMONIES

The award commencement are held during “Lễ khai giảng” (Opening Ceremony of Academic Year) at each respective partner high school. That date is chosen because our aims is to encourage not only recipients, but also all other students.

13 students have been awarded scholarships at Hau Loc High School (Thanh Hoa) at the New School Year Opening Ceremony (NSYOC) on 5 Sep 2013.

9 students have been awarded scholarships at Su Pham High School (Hanoi) at the NSYOC on 7 Sep 2013

5 students have been awarded scholarships at Quoc Hoc High School (Hue) at the NSYOC on 9 Sep 2013

Representatives of 12 students have been awarded scholarships at Tong hop High School (Hanoi) on 29 Sep 2014.

Hall of Fame

ORCHID ALUMNI

Orchid Alumnus to Win Gold Medal in The 2014 International Mathematical Olympiad

Orchid Scholarship Foundation: Orchid attempts have made impacts. Nguyen The Hoan, who has been selected to award the Orchid Scholarship last year, has won the highest prize in the recent International Mathematical Olympiad. In his application for the Orchid Scholarship, he appreciated the supports from his family, teacher, friends and the Orchid Scholarship Foundation, as well as exhibited the dream to be a good lecturer. Below is an article about him being translated from one of the most popular online news publishers in Vietnam,

Nguyen The Hoan and his family

Son of construction workers is gold medal winner of International Mathematical Olympiad 2014

(Source: VNExpress, translated by Ton Nu Hoang Lan)

On the day Mr. Hoa and his wife sent their son to Hanoi to enroll in the High School for Gifted Students (HSGS) of Vietnam National University, Hanoi, they also left their village to look for temporary jobs in Hanoi to support their son's study.

At 5 AM 14th July, the family of Nguyen The Hoan (11th grader of the HSGS of Vietnam National University, Hanoi) was eager to go to the airport to welcome him after the International Mathematical Olympiad (IMO) 2014 competition. His mother, in a white shirt, jeans and sandals, was holding a bouquet of flowers while continuously looking at the arrival gate. Meeting her son, Ms. Thach hugged him with teary eyes. "Hard-working and well-behaved children are the most valuable asset of a family", the mother said.

Hoan was born in a farming family in Hoa Binh, Hung Ha district, Thai Binh province, situated in the Northern Vietnam. Profits from a small piece of paddy rice, which is all they had, was not enough to feed the family of four, let alone to afford tuition fees and other necessary expenses for their two growing sons.

Appreciating that his parents have been working very hard to afford the family, Hoan has always been very focused on his study. With natural-born talents, during the primary and secondary years, Hoan had received numerous awards for outstanding academic results, including those from the provincial level. All the walls in his small house were densely decorated with his 34 certificates and awards.

After the high school entrance exams, Hoan was admitted to three prestigious schools for gifted students: HSGS of Hanoi University of Education, HSGS of Vietnam National University, Hanoi and HSGS of Thai Binh Province. Carrying the dream of studying in the same school with International Olympiad winners such as Le Hung Viet Bao, Ngo Dang Tuan..., Hoan asked his parents to allow him to go to Hanoi to continue the high school years.

"My son said that in Hanoi, he would need just the same amount of food. The HSGS of Vietnam National University, Hanoi has been his long term dream. With the love for him and the wish that he would succeed in his study, my husband and I decided to go to Hanoi looking for temporary jobs", said Ms Nguyen Thi Thach (38 years old), Hoan's mother.

The day Hoan entered high school was also the day his parents left their village to go to Hanoi to become temporary construction workers. The couples did not rent a place to stay but have been staying in temporarily tents at the construction sites. Despite their sickness or bad weather, the couples have always been at the construction sites to do their jobs. Their combined monthly salaries are about 6 to 7 million VND (about 350-400 SGD), half of which they spend on Hoan's tuition fees and their daily expenses. The rest they send home for the grandparents to take care of the second son, a 9th grader of a gifted class specialized in Literature.

With teary eyes, Ms. Thach recalled those days when Hoan skipped his breakfast to save for daily expenses. When he was sick, he didn't inform his parents because he didn't want them to worry for him and to spend more money on him. "Only when he had high fever with severe symptoms that his friends contacted us to bring him to the hospital for intravenous infusion", said Ms Thach.

Although his parents have been staying in temporary tents at the construction sites, Hoan has never felt ashamed about it. He even feels proud that "Everyone has their own job and I am proud of my parents who have always sacrificed for me." International Mathematical Olympiad gold medal is a precious gift that Hoan dedicated to his parents for their sacrifice.

Hearing the news that Hoan has won the gold medal, his mother burst into happy tears till she almost fainted. During that day, fellow workers at the construction site happily shared the news and admired the family. In Thai Binh province, for two consecutive days, Hoan's grandparents were busy greeting relatives, friends and teachers who came to share the joy. The whole family was proud of Hoan and looking forward to welcoming the 'golden' boy in the village.

Speaking of his own victory, the 11th grader of the HSGS of Vietnam National University, Hanoi just smiled gently and shared that "I am very glad to achieve my academic dream. After the exam, I thought I would only win a Silver medal, not a Gold one." Hoan is the youngest member of the Vietnamese IMO team this year.

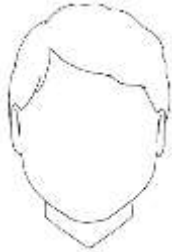

The competition days in South Africa, Hoan said, were tough for the Vietnam team due to unfamiliar food, time difference and cold weather of below 10 degrees at nights. However, with caring and effective measures from the training teachers, all of the team's six contestants were healthy and comfortable during the competition.

The International Mathematics Olympiad exam this year was a bit different, with more focus on combinations. However, there were still two questions about geometry, Hoan's area of strength. "I feel very fortunate for that. When knowing that I still won the gold medal with my 29 points, I felt very happy not only for myself but also for the whole team because our achievement would also be augmented ", Hoan said.

With great interest in the subject that requires continuous training of the brain since childhood, Hoan is planning to pursue Applied Mathematics as his long term career. His short term plan is to improve his English to get a scholarship to study overseas "I will try to obtain good scholarships so that my parents will not need to worry about my tuition fees and expenses", Hoan said.

Financial Summary

INCOME STATEMENT

As part of our sustainable policy, half of the cumulative balance will be used to award scholarship in the corresponding year. Another half will be combined with the next year, to secure the financial instability.

In 2014, we have successfully raised 9,378.74 SGD. The cumulative cash balance is 12,504.54 SGD, which is equivalent to about 200,000,000 VND. About 100,000,000 VND will be awarded to about 50 students nationwide in 2014; while the remaining will be saved for the next year.
